The IEF Training Program for the year 2022

برنامج الدورات التدريبية بالمنظمة العالمية للطاقة للعام 2022

Introduction:

The International Energy Foundation (IEF) is pleased to present its program of activities for 2022. As you know, the IEF is a non-governmental, non-political, non-profit making organization, headquartered in the city of Tripoli, which works to promote and encourage science and knowledge in the fields of energy and its branches and related sectors. The first regional symposium on women and renewable energy was organized in collaboration with a number of international, regional and local bodies in 1990. The scientific activities have continued in succession, including conferences, seminars, panel discussions, exhibitions, workshops and training courses. During the thirty years of its existence, the IEF has held more than 33 international conferences, most notably the Mediterranean petroleum Conference and Exhibition, which was held in 1991 under the auspices of the National Oil Corporation, and the fourteenth session of this conference in 2014, and more than 400 training courses attended by more than 2600 trainees. The IEF has also published numerous scientific publications, and has grown in membership from most countries of the world institutions and individuals. The IEF hosted visiting professors of experts and prominent scientific figures in its various fields. It has obtained recognition from various international organizations, including being considered a specialized non-governmental organization with the Economic and Social Council of the United Nations in New York (ECOSOC), the United Nations Industrial Development Organization in Vienna (UNIDO), the United Nations Development Program in Libya (UNDP), the United Nations Environment Program (UNEP), the United Nations Environment Facility (GEF), and the Islamic Educational Scientific and Cultural Organization (ISESCO), among others.

With the extraordinary circumstances experienced by Libya during the transitional period after the February 17 revolution, the IEF has been coexisting with these conditions, maintaining its status and continuing to enable it to conduct scientific activities focused on training courses, as one of its objectives and one of its most important achievements. The IEF has participated in local and the international activities, and looks forward for more work and creativity.

The IEF is pleased to attach here its training program for the year 2022, including training courses in various disciplines, we would appreciate it if you could inform us to the courses you would like to nominate participants at your end to attend

President IEF
